

# Peter van Dijk

DevOps

## Professional Summary

Highly skilled and results-oriented Senior DevOps Engineer with over 8 years of experience in designing, implementing, and managing robust, scalable, and secure infrastructure. Proficient in automating deployment pipelines, optimizing cloud environments, and fostering a culture of collaboration between development and operations teams. Passionate about leveraging cutting-edge technologies to enhance system reliability and accelerate software delivery cycles.

## Work Experience

### Senior DevOps Engineer

March 2021 - Present

TechFlow Innovations, Amsterdam, Netherlands

- Led the design and implementation of CI/CD pipelines using GitLab CI, reducing deployment time by 40%.
- Managed and optimized AWS cloud infrastructure, ensuring high availability and cost efficiency.
- Implemented Infrastructure as Code (IaC) with Terraform, managing over 50 cloud resources.

### DevOps Engineer

June 2017 - February 2021

GlobalByte Solutions, Utrecht, Netherlands

- Developed and maintained containerized applications using Docker and Kubernetes.
- Monitored system performance and troubleshoot issues using Prometheus and Grafana.
- Automated system administration tasks with Python scripting and Bash.

### Junior System Administrator

September 2015 - May 2017

Nexa Digital, Rotterdam, Netherlands

- Provided technical support for Linux servers and network infrastructure.
- Assisted in the deployment and configuration of enterprise applications.
- Documented system configurations and operational procedures.
